

AM General Showcasing Continuous Automotive Innovation with All-New HUMVEE NXT 360 at IDEX 2021

February 19, 2021

SOUTH BEND, Ind., February 2021 – Leading light tactical vehicle manufacturer, AM General, will participate in the International Defence Exhibition & Conference (IDEX) show held at the Abu Dhabi National Exhibition Centre February 21-25, 2021, Stand 02-B10 in the U.S. Pavilion. This will mark the debut of the all-new HUMVEE NXT 360, the company's newest light tactical vehicle that offers increasing levels of protection. Not only will visitors be the first to explore the vehicle, but they will also have the opportunity to learn about the company's robust and diverse product offerings.

"We are enthusiastic to participate at IDEX and impressed at the level of coordination and support that the organizers have provided so that we can have a safe and successful show during these challenging times," said Nguyen Trinh, AM General Executive Vice President of International Defense. "We are also extremely excited to debut the NXT 360 to our international customers as this the first opportunity for them to have a hands-on experience with this ground-breaking vehicle."

The company will display the all-new HUMVEE NXT 360 ES – a rugged light tactical vehicle that is redefining survivability. Built with proprietary technology, this vehicle allows for 360-degree kinetic energy threat protection as well as blast threat protection. Currently offering two variants (Base and ES), the NXT 360

leverages the existing HUMVEE® platform and includes additional enhancements. The ES model will offer a 6.5L V8 turbocharged engine with 250 Hp and is equipped with a long travel suspension for increased agility no matter the terrain – all optimized for exceptional transportability via land, sea, and air.

AM General representatives will also be available to discuss the wide variety of mobility solutions the company offers, as well as provide in-depth information on its logistics services, award-winning global supply chain management, and field service support.
