IDEX 2021: FN Herstal invites Defense and Security professionals to visit its virtual booth for valuable product information

(Herstal, Belgium) – February 19, 2021. **Belgium-based FN Herstal, one of the world’s leading designers and manufacturers of small caliber weapons, integrated weapon systems and associated innovative solutions for the Defense and Security markets, will present its first virtual booth during the IDEX trade show in Abu Dhabi from February 21 through to 25. An additional, innovative way to keep in touch with Defense and Security professionals all over the world.**

“Welcome to our brand new virtual booth”... Here’s how FN Herstal’s host begins the virtual visit.

Due to the COVID-19 pandemic that affects all of us globally and has made travel difficult or even impossible, FN Herstal will not have the opportunity to meet visitors personally at this year’s international IDEX trade show.

This situation will not stop the Belgian company from reaching out to professionals across the globe and presenting a selection of FN® key solutions including latest innovations.

FN Elity™ and Land & Sea Mounted Weapon Solutions: two new additions to FN Herstal’s portfolio

FN Herstal’s latest innovations include the **FN Elity™ weapon mounted ballistic calculator** for sniper and precision rifles, support weapons and spotting scopes. Integrating a state-of-the-art ballistic solver developed by ApexO – expert in ballistics simulation –, a cutting-edge laser range finder and multiple designation features, the FN Elity™ guarantees optimized first round hit probability at long range.

FN Elity™ Ballistic Calculator mounted on FN SCAR®-H TPR Tactical Precision Rifle, here fitted with optional scope

FN Herstal, S.A.

Newly-developed **Land & Sea Mounted Weapon Solutions** designed around FN® combat-proven machine guns can also be discovered during this journey on FN Herstal's virtual booth.

Also on display is the entire **FN SCAR® family of rifles**, the **full range of FN® machine guns**, as well as the **deFNder® family of remote weapon stations** for both land and naval applications.

New FN® Light Multi Weapon Mount featuring FN MAG®, here with optional links and cases collector

FN Herstal virtual booth will be accessible from anywhere in the world from February 21 to 25, 2021 by clicking on www.virtual-tour-fnherstal.com. It will also be on display at IDEX 2021, Abu Dhabi, Belgian Pavilion, FN Herstal Booth 08-A20.

1889-2021
More than 130 years of excellence. Leading to the future.

FN Herstal is the Defense and Security branch of the Herstal Group.

Situated in Belgium since its creation the Herstal Group is also active in the civilian sector through its range of Hunting, Shooting and Outdoor products with the Browning and Winchester Firearms brands. The Herstal Group has almost 3,000 employees worldwide, and registered a turnover of more than 820 million Euros in 2019.*

FN Herstal's mission is to design, develop and manufacture a full range of innovative solutions at the leading edge of technology, centered on small arms and their ammunition, that meet specific market requirements today and in the future. The customers are Armed Forces, Security Forces and Special Groups worldwide.

The FN Herstal product range includes small arms, Less Lethal systems, and integrated weapon systems for air, sea and land applications, remote weapon stations, small caliber ammunition, and solutions that harness modern technology to enhance the capabilities of the dismounted combatant.

FN Herstal is based near Liège in Belgium, with three fully owned subsidiaries: FN America (USA), FNH UK (UK) and Noptel (Finland).
